Summary

Frontend Engineer with 3+ years of experience building scalable enterprise applications using React.js, Next.js, and TypeScript. Proven experience delivering complex frontend systems including collaborative media review platforms, annotation engines, PDF viewers, RBAC, and high-performance user interfaces. Strong focus on frontend architecture, performance optimization, reusable component design, and building reliable production-scale applications.

Experience

Intigly | Bangalore, India

Frontend Engineer | 08/2025 - Present

- Solely designed and developed the frontend for an enterprise media review platform competing with Frame.io, StreamWork, Air, and Krock.
- Built a collaborative review system supporting threaded comments, voice messages, annotations, drawings, and shape tools across videos, images, audio, PDFs, and unsupported files.
- Engineered a canvas-based annotation system with drawing, geometric shapes, undo/redo, zoom, pan, and precision anchor positioning.
- Developed custom media viewing systems including a video player, audio player, and image viewer with version control support.
- Built advanced media viewers with version history and comparison modes, including synchronized side-by-side and interactive slider comparison for images and videos.
- Developed a PDF viewer supporting text selection, anchor-based comments, contextual navigation, and persistent document references.
- Implemented secure public review links, enabling external clients to review assets and provide feedback without authentication.
- Optimized complex rendering workflows to maintain smooth interactions across large media files and annotation-heavy review sessions.
- Technologies: React.js, TypeScript, Tailwind CSS, HTML Canvas, REST APIs, Media APIs.

Bapa Sitaram Innovation and Technologies | Vadodara, Gujarat

Front End Developer | 10/2023 - 07/2025

- Engineered and led the development of a Solar Management System with role-based access control (admin, branch manager, agent), dynamic quotation generation, PDF handling, and multi-step consumer onboarding.
- Designed and orchestrated the creation of an eCommerce platform for Ayurveda products, integrating secure authentication, product carousels, cart, checkout, and favorite functionalities.
- Developed and managed a comprehensive admin panel for eCommerce management, featuring dashboards, user tables, order management, and CRUD operations for products.
- Enhanced and extended banking software functionality with a user-friendly web application for transaction history, account details, and responsive client access.
- Developed two official websites, ensuring responsive designs, optimal performance, and seamless deployment using Cloudflare Tunnels and Vercel.
- Spearheaded the hosting and deployment of multiple web applications using Cloudflare Tunnels and Vercel, ensuring secure and efficient operations.

Eshkon | Remote

React.js Developer | 07/2023 - 09/2023

- Spearheaded the development of over 30 reusable UI components using Next.js, TypeScript, and Redux, improving UI consistency and performance across projects.
- Integrated Contentful headless CMS for effortless content management by non-technical teams, and optimized build processes with npm and SASS for scalable, efficient web applications.
- Developed a highly optimized Next.js web application focusing on SEO and performance, utilizing SEO schema markup and advanced features like dynamic page generation to boost organic traffic and enhance user satisfaction.

Echnotech Pvt Ltd | Bangalore, Karnataka

Front End Developer | 04/2023 - 06/2023

- Led the development of highly responsive web applications using React, Redux, and Material-UI, ensuring seamless user experiences and optimized performance.
- Developed advanced features like dynamic table components with filtering, search, and pagination, and integrated RESTful APIs for smooth data interaction between the frontend and backend.
- Created a Delivery Partner Management System with KYC verification, map integration, and order tracking for wholesale operations, while implementing unit testing and code reviews to ensure high-quality code and site performance.
